Reference Ranges for pregnancy

1st Trimester 0.30 - 4.50
2nd Trimester 0.50 - 4.60
3rd Trimester 0.80 - 5.20

NOTE :-

- 1.TSH levels are subject to circadian variation, reaching peak levels between 2-4 .a.m. and at a minimum between 6-10 pm. The variation is of the order of 50%, hence time of the day has influence on the measured serum TSH concentrations.
- 2.Recommended test for T3 and T4 is unbound fraction or free levels as it is metabolically active.
- 3.Physiological rise in Total T3/T4 levels is seen in pregnancy and in patients on steroid therapy.
