Comment

A Liver Function Test (LFT) is a group of blood tests used to check the health and functioning of the liver. It measures enzymes, proteins, and bilirubin levels to detect liver damage, infection, or diseases such as hepatitis and fatty liver disease. Doctors use LFT to monitor liver health and evaluate the effect of medicines or medical conditions on the liver.

Comment

A CRP (Qualitative) Test is a blood test used to detect the presence of C-reactive protein (CRP), a substance produced by the body during inflammation or infection. The test helps identify conditions such as infections, autoimmune diseases, and inflammatory disorders. A positive result indicates increased inflammation in the body, while a negative result suggests normal CRP levels.
