Test	Result	Unit	Normal Range
<b>CRP (QUALITATIVE)</b>			
CRP (QUALITATIVE)	<b>9.2</b>		0-6.0

**Comment**

A CRP (Qualitative) Test is a blood test used to detect the presence of C-reactive protein (CRP), a substance produced by the body during inflammation or infection. The test helps identify conditions such as infections, autoimmune diseases, and inflammatory disorders. A positive result indicates increased inflammation in the body, while a negative result suggests normal CRP levels.
