BIOCHEMISTRY

BLOOD SUGAR RANDOM (BSR)		102	mg/dl	70-140
--------------------------	--	-----	-------	--------

Comment

A Random Blood Sugar (RBS) test measures the amount of glucose (sugar) in the blood at any time of the day, regardless of when a person last ate. It is used to help detect and monitor diabetes and evaluate how well the body controls blood sugar levels. High or low blood sugar levels may indicate a health problem that needs medical attention.

SEROLOGY

BLOOD GROUPING & RH FACTOR

BLOOD GROUP	"O"
RH FACTOR	POSITIVE

Comment

The patient's ABO and Rh blood group has been identified using standard immunohematological techniques. Blood group information is essential for safe blood transfusion practices, organ transplantation, and obstetric care. Compatibility testing and cross-matching are recommended prior to transfusion.
