Test	Result	Unit	Normal Range
HB (HAEMOGLOBIN)	11.5	gm/dl	11.5-15

Comment

A Hemoglobin (HB) Test is a blood test used to measure the amount of hemoglobin in the blood, a protein in red blood cells that carries oxygen throughout the body. It helps diagnose conditions such as anemia, blood loss, and other blood disorders. Low or high hemoglobin levels may indicate underlying health problems that require medical attention.
