BIOCHEMISTRY

WIDAL TEST NEW

TYPHI "O"		1/160		
TYPHI "H"		1/80		
TYPHI "AH"		1/20		
TYPHI "BH"		1/20		
Result		Positive		

Comment

Widal test is a serological test used to detect antibodies against Salmonella Typhi and Salmonella Paratyphi, the bacteria responsible for enteric fever (typhoid fever). The test measures agglutinating antibodies against O (somatic) and H (flagellar) antigens in the patient's serum. Results should be interpreted along with clinical findings and local baseline antibody titers, as prior vaccination or previous infection may influence the results.

BLOOD SUGAR RANDOM (BSR)	80	mg/dl	70-150
--------------------------	----	-------	--------

Comment

A Random Blood Sugar (RBS) test measures the amount of glucose (sugar) in the blood at any time of the day, regardless of when a person last ate. It is used to help detect and monitor diabetes and evaluate how well the body controls blood sugar levels. High or low blood sugar levels may indicate a health problem that needs medical attention.
