

Patient Name : Mrs. KISHMATI DEVI

Age : 60Y Sex : Female

Ref. By : DR.S.PRASAD,G.A.M.S

Address :

Reg. No : SP-2026-0137

Collection Date : 19-06-2026

Reporting Date : 19-06-2026

Test	Flag	Result	Unit	Normal Range
BIOCHEMISTRY				
BLOOD SUGAR(FASTING)	▲	403	mg/dl	70-110
BLOOD SUGAR PP(POST PARANDIAL)	▲	346	mg/dl	70-150

Comment

Blood Sugar PP (Post-Prandial) refers to the blood glucose level measured after a meal, usually 2 hours after eating. This test helps assess how well the body processes sugar from food and is commonly used to diagnose and monitor Diabetes Mellitus. In general, a 2-hour post-prandial blood sugar level below 140 mg/dL is considered normal for most people, though target ranges may vary depending on individual health conditions and medical advice.

If you have a specific PP blood sugar result, I can help interpret it.
