### BIOCHEMISTRY

#### WIDAL TEST NEW

TYPHI "O"		<b>1/160</b>		
TYPHI "H"		1/40		
TYPHI "AH"		1/20		
TYPHI "BH"		1/20		
Result		<b>Positive</b>		

#### Comment

Widal test is a serological test used to detect antibodies against Salmonella Typhi and Salmonella Paratyphi, the bacteria responsible for enteric fever (typhoid fever). The test measures agglutinating antibodies against O (somatic) and H (flagellar) antigens in the patient's serum. Results should be interpreted along with clinical findings and local baseline antibody titers, as prior vaccination or previous infection may influence the results.
